

Task 1:

Read the clinical notes below. Identify and label each of the following:

- **R** for Run-On Sentence
- **F** for Sentence Fragment

Task 2:

Rewrite the notes, correcting all the errors to create a clear, professional, and grammatically accurate patient record.

Dental Case Scenario: The Case of the Hurried Notes

Patient: Mr. John Davies

Date: October 26, 2023

Chief Complaint: The patient presents with pain in the lower right quadrant.

Clinical Notes (With Errors)**Subjective Findings:**

The patient reported a constant, throbbing pain that began two days ago. The pain worsens when he lies down or drinks something cold he rated the pain as an 8 out of 10. No significant relief from over-the-counter painkillers. Because the pain has become unbearable.

Objective Findings:

Clinical examination revealed a large, deep carious lesion on tooth #46 (lower right first molar). There was visible cavitation and food impaction. The tooth was tender to percussion. And sensitive to palpation. The periodontal probing depths were within normal limits, however, there was a slight buccal sinus tract present.

Radiographic Findings:

A periapical radiograph was taken. Showing the radiolucency extending to the pulp chamber of tooth #46. There is also a periapical radiolucency visible. Suggesting a chronic apical abscess.

Assessment & Plan:

Diagnosis is symptomatic irreversible pulpitis with chronic apical periodontitis for tooth #46. The treatment options were explained to the patient, including non-surgical root canal treatment or extraction. The patient opted for root canal therapy. We prescribed a course of amoxicillin to manage the infection. And scheduled the procedure for the following week. The patient was advised to take analgesics as needed he was also given post-operative instructions.

Practice 2:

Correct eight run-on errors using a variety of correction methods.

EXAMPLE: Extracting rare earth metals is expensive ^{and} it also damages the environment.

1. Rare earths are a collection of seventeen elements, manufacturers need these elements to produce numerous items. For example, color televisions, lasers, radar systems, military hardware, and computers contain rare earth elements.
2. Rare earth metals are not really rare they are found mostly in certain countries around the world. China produces 97 percent of world supplies it easily surpasses American production. Many nations are becoming concerned about the Chinese monopoly of rare earth production, the metals are very necessary in the manufacturing of new technological products.
3. Recently, China has used its rare earth reserves as a political weapon. Japan and China had a diplomatic row in 2010 over disputed ownership of islands in the East China Sea. The Japanese arrested Chinese fishers near the islands China withheld exports of rare earths to Japan. The elements are crucial for the Japanese electronics industry.
4. American bureaucrats are worried that China may withhold exports to the . United States during a dispute the scarcity would lead to a disaster for the manufacturing sector. Politicians feel that dependence on the Chinese is troublesome, it may lead to both economic and national security risks. The government is looking for other sources of rare earths it is also looking at ways to mine American deposits of the elements in an environmentally safe way.

Practice 3:

Write C next to correct sentences and F next to fragments.

EXAMPLE: Industrial accidents harm people's health. C As well as the environment. F

1. In 1984, a terrible chemical accident happened. _____ In Bhopal, India. _____ Union Carbide was one of the largest chemical companies in the United States. _____ It built a plant in downtown Bhopal in 1969. _____ In 1984, a holding tank leaked toxic gas. _____ Which killed thousands of people. _____ Other victims suffered from health problems. _____ Such as blindness and respiratory diseases. _____ The company refused to take any responsibility for the accident. _____ Even though the Indian government accused it of negligence. _____ The government sued the firm for monetary compensation. _____ For the victims. _____ It wanted billions of dollars. _____ However, the victims' families only received about \$2,000. _____

2.
