Activity

- **Setting:** A friend tells you a dental myth, such as “put an aspirin on the gum for toothache” or “whitening toothpaste will make your teeth white in one day.”
- **Task:** Write a reply that politely corrects the myth within 3 minutes.

LEARNING OBJECTIVES

By the end of this lesson, you will be able to:

- Understand the stages of the writing process.
- Apply prewriting techniques to generate and organize ideas.
- Develop a clear and structured draft by focusing on content creation.
- Revise and edit your writing for clarity, coherence, and grammatical accuracy.
- Proofread to eliminate small errors and finalize your work.

INTRODUCTION TO THE WRITING PROCESS

- **Prewriting** — Free-writing, brainstorming, mind-mapping, questioning, outlining
- **Drafting** — Turning ideas into structured writing
- **Revising**
- **Editing**
- **Proofreading**

— Ensuring correctness, clarity, coherence, and conciseness

PREWRITING

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

FREEWRITING – UNLEASHING YOUR CREATIVE FLOW

- **Freewriting:** Write continuously in rough sentences or phrases.
- **No Worries:** Don't stress about spelling, punctuation, or structure.
- **Explore Ideas**: Write whatever comes to mind for 10 minutes or more.
- **Benefits**:
  - Limbers up writing muscles
  - Breaks through mental blocks.
  - Clarifies initial ideas and leads to new ones.
  - Helps develop the habit of thinking while writing.

BRAINSTORMING – GENERATING IDEAS FREELY

- **Brainstorming:** Generate ideas freely in list or diagram form.
- **No Restrictions:** Write down every idea, whether big or small.
- **Purpose**: Explore a topic broadly, gathering multiple angles and perspectives.
- **Benefits**:
  - Encourages creative thinking
  - Helps uncover unexpected ideas
  - Lays the foundation for more focused writing
  - Serves as a great starting point for organizing thoughts later

Topic: Root Canal Aftercare

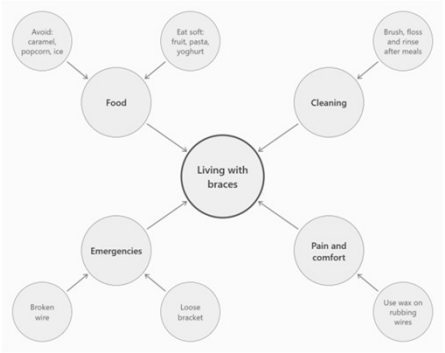

numbness lasts a few hours, don't eat until numbness wears off, mild soreness is normal, avoid chewing on that side, temporary filling, come back for crown, pain medicine as advised, don't bite your cheek, swelling, fever, brush gently, don't chew hard food, what if the filling falls out, follow-up visit

MIND MAPPING – STRUCTURING IDEAS VISUALLY

- **Mind Mapping:** A visual representation of ideas branching out from a central concept
- **No Restrictions:** Start with a central idea, then add subtopics and details.
- **Purpose**: To see connections between ideas and structure them hierarchically
- **Benefits**:
  - Encourages organized thinking
  - Helps break down complex topics
  - Provides a clear visual roadmap for writing

DOW UNIVERSITY of HEALTH SCIENCES

QUESTIONING – EXPLORING YOUR TOPIC

- **Questioning:** A technique where you ask critical questions about your topic
- **Key Questions:** Who, what, where, when, why, and how
- **Purpose**: To deepen understanding and uncover more angles
- **Benefits**:
  - Encourages deeper analysis of the topic
  - Helps clarify the scope of your writing
  - Uncovers hidden ideas and perspectives

OUTLINING – ORGANIZING YOUR THOUGHTS

- **Outlining:** A structured plan to organize your main points and details
- **Clear Structure:** Start with the main idea, followed by subpoints and supporting details.
- **Purpose**: To create a logical framework before writing
- **Benefits**:
  - Provides a roadmap for your writing
  - Keeps ideas organized and on track
  - Ensures logical flow and coherence in the writing

DRAFTING

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

DRAFTING – TURNING IDEAS INTO WRITTEN FORM

- **Drafting:** The step where ideas are transformed into written text
- **Purpose:** To get your thoughts and ideas onto paper
- **Key Focus**: Write freely without worrying about structure or perfection.

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

DRAFTING TECHNIQUES – TIPS FOR SUCCESS

- **Write Continuously:** Don't stop to edit; keep the flow of ideas going.
- **Focus on Ideas:** Concentrate on content, not grammar or spelling.
- **Start Anywhere**: If you're stuck, begin with the section you're most confident about.
- **Be Open to Change:** Drafting is flexible—expect ideas to evolve.

REVISING

EDITING

PROOFREADING

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

INTRODUCTION TO REVISING, EDITING, AND PROOFREADING

- **Revising:** Rewriting to make the draft stronger and clearer
- **Editing:** Correcting grammar, punctuation, and style
- **Proofreading**: Checking for small errors like typos and spacing

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

THE PROCESS OF REVISING

- **Revising** is like "cleaning house"—removing unnecessary content and putting ideas in the right order.
- **Two Stages:**

Revising Content: Focus on the unity, support, and organization of your ideas

Revising Sentences: Refine sentence structure, word choice, and style

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

THE IMPORTANCE OF EDITING

- **Editing:** Focuses on correcting grammar, punctuation, and style.
- **Key Questions:**
  - Are my grammar and punctuation correct?
  - Are there any spelling mistakes?
  - Is the language clear and concise?

PROOFREADING FOR FINAL TOUCHES

- **Proofreading:** Focuses on catching small errors like typos, spacing, or formatting.
- **Key Tips:**
  - Read your writing aloud.
  - Check for consistency in formatting and spacing.
  - Ensure no careless mistakes remain.

Clinical Scenario: Post-Operative Patient Care Instructions (Tooth Extraction)

① **PREWRITE (5 Mins)**
Brainstorm 4 key warnings/instructions for a post-extraction patient (e.g., bleeding, ice pack, diet, dry socket).

② **DRAFT (7 Mins)**
Write a discharge advisory leaflet directly addressed to a nervous patient using simple language.

③ **REVISE & EDIT (5 Mins)**
Swap with a peer. Replace overly medical jargon (e.g., *"hemostasis"*, *"analgesic"*) with empathetic patient terms.

④ **PROOFREAD (3 Mins)**
Check capitalization, dosage numbers, and contact info layout to ensure zero error before clinical release.

A finalized 1-page patient discharge card ready for clinical use at Dow Dental Hospital.

Total Time: 20 Mins

Revising (big picture: content, order, audience)

Rubrics	3: Strong	2: Developing	1: Needs work
Content completeness	All 4 key points are covered (bleeding, ice pack, diet, dry socket), plus when to call the hospital	3 points covered, or the "when to call" advice is missing	2 or fewer points covered, or advice is vague or incorrect
Organization	Each topic has its own short heading. Order is logical, such as first 24 hours, then eating, then warning signs	Mostly logical, but some ideas are mixed together	Ideas are scattered with no clear structure
Audience and tone	Speaks directly to a nervous patient ("you"). It is calm and reassuring, and does not scare	Mostly patient-friendly, with some cold or alarming phrases	Reads like a clinical note or is written for a doctor

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

Editing (word and sentence level)

Rubrics	3: Strong	2: Developing	1: Needs work
Jargon replaced	No medical jargon remains. For example, "hemostasis" becomes "the bleeding stops" and "analgesic" becomes "pain medicine"	1–2 technical terms remain unexplained	Many technical terms remain
Simple, clear sentences	Sentences are short (about 15 words or fewer) and use one instruction each. The language is active ("Bite on the gauze")	Some long or passive sentences	Long, complex, or confusing sentences
Empathy and consistency	Wording is kind and encouraging ("This is normal…"). Terms and style are consistent throughout	Kind in places, but the tone or terms change	Commands only, with no reassurance, and inconsistent terms

DOW UNIVERSITY of HEALTH SCIENCES

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.

Proofreading(zero-error check before clinical release)

Rubrics	3: Strong	2: Developing	1: Needs work
Capitalization, spelling and punctuation	No errors, and headings are capitalized consistently	1–3 minor errors	4 or more errors, or errors that affect meaning
Numbers and dosage	Every dose, time and quantity is correct, with units (mg, hours, minutes) and each number checked twice	A unit is missing or a number is unclear	A number or dose is wrong or missing, which is a safety risk
Contact info and layout	Hospital name, phone number and emergency instructions are easy to find. Everything fits on 1 page with clear spacing	Contact info is present but hard to spot, or the page is crowded	Contact info is missing, incomplete or incorrect, or the leaflet is more than 1 page

SUMMARY

- Prewriting: Generate and organize ideas using techniques like brainstorming and outlining.
- Drafting: Turn ideas into a structured draft without focusing on perfection.
- Revising, Editing, and Proofreading: Refine content, correct errors, and polish the final draft for clarity and accuracy.
